- Community Health Workers
- Public Health Nurses

## MALABAR CANCER CENTER

Dear Colleague,

Cancer is a curable chronic disease though it is still looked up on with great fear by mankind. In India though cancer incidence has not gone as high as in the west, most of the patients present in the advanced stages of cancer. Hence despite having state of the art treatment facilities at least in major centers we are unable to make an impact on survival.

Early detection of Cancer is the solution to avoid the catastrophic impact of high mortality rates. Nurses can make this impact in the community in a most palpable way.

This CNE is aimed to bring in latest guidelines in screening, the difficulties faced at early detection program and the effects of screening. An Indian scenario is brought to the lap of the fraternity of nursing. We hope this CNE will be an academic feast and we welcome you all to the land of four "C"; Cake, Cricket, Circuses and now Cancer centre.

So we cordially invite you to attend this academic deliberation and make this event a success.

With kind regards

*Organizing Secretary*
