## **MALABAR CANCER CENTRE**

THALASSERY

**ANNUAL REPORT  
2014**

## **ACKNOWLEDGEMENT**

The Hospital Based Cancer Registry of Malabar Cancer Centre expresses its sincere thanks and gratitude to the following Institutions/Departments/Individuals for supporting and promoting the activities of the Registry.

1. Dr. Satheesan Balasubramanian, Director, Malabar Cancer Centre
2. National Cancer Registry Programme, Indian Council of Medical Research, Bangalore
3. Medical Records Division, MCC, Thalassery
4. Department of Radiation Oncology
5. Department of Clinical Hematology & Medical Oncology
6. Department of Pathology
7. Department of Surgical Oncology

## FROM DIRECTOR'S DESK

**M**alabar Cancer Centre (MCC) is an autonomous institution under Department of Health & Family Welfare, Government of Kerala. The centre established in 2001 at Thalassery with an aim to provide a quality treatment to the cancer patients in and around the region. The development of the institution into an academic and research organization in past five years has been a tremendous achievement for the region disseminating benefit to a large section of population. Now patients not only from Kerala but from neighbouring states seek treatment at MCC. MCC established its Hospital Based Cancer Registry (HBCR) in 2010 with just two staff. Now it has a large population based cancer registry named Malabar Population Based Cancer Registry (MPB-CR). It is my pleasure to present our HBCR Annual Report for the year 2014. This is the fifth Annual report after establishing the Hospital Based Cancer Registry in 2010. I may take the opportunity to congratulate the staff of the Department of Cancer Registry and Epidemiology for their team work. We are grateful and appreciative of the support of ICMR/NCRP for the completion of this report.

There are 4042 new cancer cases reported in the year 2014 of which 2140 males (52.9%) and 1902 females (47.2%). Like previous years lung is the leading site of cancer in males followed by mouth. Similarly in females breast is the leading site of cancer followed by cervix uteri. Apart from PBCR we can use this five years report also to understand the general trend and types of cancer in this region. Hope This report describes the extent and nature of the

cancer burden in this region and help in the formulation of cancer control activities.

The tobacco menace still looms over the population despite a presumed reduction in smoking tobacco. The impact of primary prevention activities related to tobacco will take many decades to show up the impact on the incidence of tobacco related cancer. Total proportion tobacco related cancer (TRC) relative to all sites is 51.4% and 18.3 % among males and females respectively. TRC with respect to all sites Lung cancer predominates (20.7%) among males, whereas in females, it was mouth (5.5%). TRC with respect to specific site, among male it is Lung (40.1%) and among females it is mouth cancer (29.8%).

The major five leading cancers found in male were cancers of Lung (20.7%), Mouth (8.2%), Stomach (7.2%), Tongue (5.2%), Non-Hodgkin's Lymphoma (4.8%), and in females, they were Breast (31.5%), Cervix uteri (7.7%), Mouth (5.5%), Ovary (5.3%), Lung (4.4%). According to Broad group of treatment, among males, 36.8% received treatment only at RI and while, among females, it was 39.3%. The clinical extent of disease only at RI was regional in 56.4% in males and 65% in females

The system wise representation of cancers showed that head and neck cancers (total number 854, among them 66.7% were males and 33.3% were females) followed by digestive systems (total number-798, 62.5% were males, 37.5% females), breast (total number 607, 1.2% were males and 98.8% were females), respiratory system (total number-525, 84.2% males and 15.8% females) and hemato reticuloendothelial system (total number-366, 56.6% were males and 43.4%) forming the lineup.

The number of pediatric malignancies reported in MCC is less as the institution treats only pediatric hematological malignancies and a few solid tumors.

This report of HBCR is expected to bring out a picture on the incidence of cancer in the region and the pattern of presentation. Once again I thank Dr. Nandakumar, former Director-in charge, ICMR-NCRP for extending his invaluable support to us for taking forward the project and bringing out this report. I congratulate all staff of Department of Cancer Registry and Epidemiology under the stewardship of Dr. Saina Sunilkumar for such a great effort.

**SATHEESAN.B**  
DIRECTOR

**M**alabar Cancer Centre is an autonomous institution under Health and Family Welfare under Societies Registration Act XXI of 1860, and started its clinical activities from March 2001 onwards, providing the much-required oncology care to the population of Northern Kerala and other neighboring states.

Hospital based cancer registry, started functioning from 2011. Now we have successfully completed our five years report. The purpose of the hospital-based registry is to serve the needs of the hospital administration, the hospital's cancer programme, and above all, the individual patient. The establishment of individual hospital cancer registries is historically rooted in the belief that individual patients are better served through the presence of a registry. The orientation of a hospital registry is towards administrative and patient purposes. Within the hospital, a registry is often considered to be an integral part of the hospital's cancer programme or cancer care health delivery system. One of the functions of a hospital registry is to produce an annual report to the hospital administration on the cancer activities that have taken place during the year and to document things such as the cancer burden borne by the hospital.

I, am glad to present our fifth annual report along with the consolidated five year report from 2010-2014. This was attained due to the support and guidance rendered by our Director. We owe our sincere thanks to former ICMR-NCRP, Director in –charge, Dr.A.Nandakumar, for the encouragement and technical support. So, also the entire staff of registry, who have stood like pillar accepting and overcoming all challenges put forth.

Sincerely,

**Dr.Saina Sunilkumar**  
Head of the Department-(I/C)

## INTRODUCTION

### MCC - A Comprehensive Cancer Centre in Northern Kerala

Malabar Cancer Centre, Thalassery (MCC) is an autonomous institution under Health and Family Welfare Department, Government of Kerala, started with an aim to establish a comprehensive cancer centre, providing the much-required oncology care to the population of Northern region of Kerala and neighboring parts of Karnataka and Tamilnadu states and Union Territory of Pondicherry(Mahe). The centre, situated in a beautiful hill top in Kodiyeri in Thalassery Municipality 5km away from town established in 2001 .The main objective of the Centre is not only to provide comprehensive cancer care but also to develop as a Research and Training Centre of International standards.. At present MCC has around 110 in-patient bed strength which is expected to be increased to 200+ in near future.

The institution is a tertiary cancer centre which renders its service to society with equal thrust on clinical and translational research, Education and Clinical oncological services. MCC is being developed as a postgraduate institute of oncology. The institution is in the process of developing and establishing a unique Clinical Research department to coordinate clinical research activities. It is our immense pleasure to disclose the research association MCC has

with School of Health Sciences, Kannur University, Centre for Electronic Materials Technology, Thrissur and P.S.Vaidhyarathnam Ayurveda College, Kottakkal, HTIC-Chennai, National cancer Grid which are expected to bring in revolutionary changes in the management of cancer. Malabar Cancer Centre has been recognized as Research Institute by Kerala University of Health Science.

The control and management of the Society are vested in the Governing Body consisting of 23 members with the Hon'ble Chief Minister of Kerala as the Chairman, Hon'ble Minister for Health as Vice Chairman and Hon'ble Minister for Power as Alternate Vice-Chairman. The routine activities and functions of the Centre are supervised by the Executive Committee, with the Secretary, Department of Health and Family Welfare, Government of Kerala, being the Chairman of the Committee. The members in the Governing Body and Executive Committee are functioning by virtue of their official positions. The institute has grown to have highly sophisticated facilities to provide cancer care. The hospital has very well trained staff, rendering cancer care to the needy.

## ORGANISATION

Governing Body (GB): The Governing Body of the Society consists of 23 members.

1	<b>Chairman</b>	<b>Chief Minister of Kerala</b>
2	Vice-Chairman	Minister for Health & FW, Kerala
3	Alternate Vice-Chairman	Minister for Electricity, Kerala
4	Member	Secretary, Department of Finance, Kerala
5	Member	Secretary, Department of Power, Kerala
6	Member	District Medical Officer, Kannur
7	Member	Secretary, Department of Health & FW, Kerala
8	Member	An eminent Medical Scientist

9	Member	Secretary, Department of Science, Technology & Environment
10	Member	One nominee of the Ministry of Health, Government of India
11	Member	Principal, Medical College, Kozhikode
12	Member	Secretary- Planning & Economic Affairs Department, Kerala
13	Member	Director- Rajiv Gandhi Centre for Bio technology, Trivandrum
14	Member	Director of Medical Education, Directorate of Medical Education, Trivandrum
15	Member & Secretary to GB	Director, Malabar Cancer Centre, Thalassery
16	Member	M.L.A. of the Thalassery constituency
17	Member	President, District Panchayat, Kannur District
18	Member	Chairman, Thalassery Municipality, Thalassery
19	Member	A public man from North Malabar region (to be nominated by Government of Kerala)
20	Member	One Head of the department nominated from Malabar Cancer centre, Thalassery by the Government.
21	Member	One nominee of the Charitable Society established for rehabilitation and financial assistance for poor cancer patients
22	Member	Principal/Chief Executive Officer of Medical College, Pariyaram
23	Member	Director, Regional Cancer Centre, Trivandrum

## EXECUTIVE COMMITTEE

**Executive Committee (EC):** The Executive Committee shall be composed of;

1	Secretary, Department of Health & Family Welfare, Government of Kerala	Chairman
2	Secretary, Department of Power ,Government of Kerala	Member
3	Secretary, Department of Finance, Government of Kerala	Member
4	Chairman, Thalassery Municipality	Member
5	A public man from North Malabar to be nominated by Government of Kerala	Member
6	Secretary, Department of Planning, Government of Kerala	Member
7	Director, Regional Cancer Centre, Trivandrum	Member
8	The Director, Malabar Cancer Centre, Thalassery	Member/Convener

## **DEPARTMENT OF CANCER REGISTRY AND EPIDEMIOLOGY**

Department of Cancer Registry and Epidemiology was established in the year 2010 and started Hospital Based Cancer Registry partially supported by National Cancer Registry Programme (ICMR), Bangalore. This is the Fifth Annual report of Hospital Based Cancer Registry. Funded project of NCRP/ICMR, Patterns of Care & Survival Studies in Breast, Cervix & Head & Neck cancers started in 2014 .Also launched Malabar Population Based Cancer Registry on 1st January 2014 in the districts of Kannur, Kasaragod & Mahe (Two States- Kerala & Pondicherry) with the help of 8 field staffs – 4 social Investigators and 4 Data Collectors. There are three divisions under Department of cancer registry & Epidemiology.

<b>Cancer Registry Division</b>	
Dr. SainaSunilkumar	Lecturer, HOD in charge
Smt. Bindu T	Lecturer in Biostatistics
Sri. Ratheesan.K	Lecturer in Biostatistics
Sri. Prachith K S	Coding Clerk
Smt. Rincey.K	Data Entry Operator
Smt. Sheena.E	Data Entry Operator
Smt. Nithya C.V	Coding Clerk
<b>Field Staff (Malabar Population Based Cancer Registry)</b>	
Smt. Deepthi.K	Social Investigator
Sri. Rince Mani	Social Investigator
Sri. Nijin. P	Social Investigator
Sri. Micheal Babu N B	Social Investigator
Miss.Rejisha.R	Data Collector
Sri. Muhammed Shafeer C K	Data Collector
Smt. Vipina K P	Data Collector
Smt. Binya Krishna C M	Data Collector
<b>Medical Records Division</b>	
Sri. . Jayadev.G	Medical Records Officer
Miss. Indulekha M R	Medical Records Assistant
Miss.Nameetha S	Medical Records Attender

### **Cancer Registration [HBCR & PBCR]**

Cancer Registration is the process of systematically and continuously collecting information on malignant neoplasm reported. Broadly there are two types of cancer registries – Hospital Based (HBCR) and Population Based (PBCR).Cancer patterns vary not only throughout the world but also between different population Groups within the same country. Epidemiologic studies based on these help in knowing what are happening and what can be done about it. Cancer registries provide the needed information to undertake such investigations.

## **HOSPITAL BASED CANCER REGISTRY**

Hospital based cancer registries collect information of cancers reported in a given hospital, regardless of where that person with cancer resides. Hospital based registries help in assessing cancer patient care in a given hospital and aid in hospital administration including the individual hospital's cancer control programmes. Hospital registries help in planning and monitoring survival studies and clinical trials. Hospital registries contribute cases to the population based cancer registry in the area.

The cancer registry is an essential part of any rational programme of cancer control. Its data can be used in a wide variety of areas of cancer control ranging from etiological research, through primary and secondary prevention to health-care planning and patient care, so benefiting both the individual and society. The main objective of the cancer registry is to collect and classify information on all cancer cases in order to produce statistics on the occurrence of cancer in a defined population and to provide a framework for assessing and controlling the impact of cancer on the community. The collection of information on cancer cases and the production of cancer statistics are only justified, however, if use is made of the data collected. Cancer registry information may be used in a multitude of areas, and the value of the data increases if comparability over time is maintained. Cancer epidemiologists use their knowledge of the distribution of cancer in human populations to search for determinants of the disease.

The primary purpose of Hospital Based Cancer Registries is to contribute to patient care by providing readily accessible information on the patients with cancer, the treatment received and its results. The data is also used for clinical research and for epidemiological purposes. Hospital based cancer registries are concerned with recording of information on the cancer patients seen in a particular hospital (Isabel dos Santos Silva et al, 1999). Within the hospital, a registry is often considered to be an integral part of the hospital's cancer programme or health care delivery system.

## **FUNCTIONING OF HBCR**

The data abstraction and entry are done using the hospital files. The demographic data are collected and entered into the computer at the time of new patient registration at MCC and transfer to the core- pro forma of the National Cancer Registry Programme (NCRP) of Indian Council of Medical Research (ICMR). The data transfer of the ICMR Core pro forma- first part (demographic details) and second part (diagnostic treatment and follow up details) is entered using the ICMR software after retrieving case sheets from the MCC Medical Records division. All variables in the core pro forma except age and various dates are directly selected. The selection box contains all the codes along with their descriptions for each variable. Hence, this helps to avoid mistakes beyond the range of values for each variable. The selection box corresponding to the variable topography and morphology contains the third edition of international classification of diseases for oncology (ICD-O-3) and the international classification of diseases (ICD-10).

## **DATA PROCESSING ANALYSIS**

After abstraction, coding and data entry the data were sent to the coordinating unit of the NCRP of ICMR, Bangalore in an electronic format and the data was subjected to various range, consistency, unlikely combinations, and duplicate checks. Necessary corrections are done based on the error list of the cases sent by the coordinating unit and this report is generated.

## **ACTIVITIES**

### **Ongoing Projects:**

1. Hospital Based Cancer Registry(HBCR)
2. Population Based Cancer Registry (PBCR)
3. Patterns of Care & Survival Studies
4. Lifestyle and Cancer

### **Malabar Population Based Cancer Registry:**

The Malabar Population Based Cancer registry was launched in 2014 for three districts Kannur, Kasaragod and Mahe. Population-based cancer registries seek to collect data on all new cases of cancer occurring in a well-defined population. Usually, the population is that which is resident in a particular geographical region. As a result, and in contrast to hospital-based registries, the main objective of this type of cancer registry is to produce statistics on the occurrence of cancer in a defined population and to provide a framework for assessing and controlling the impact of cancer in the community.

### **Lifestyle and Cancer**

To assess the epidemiological evidence on diet and cancer and to make public health recommendations, the department started the project titled “Lifestyle and Cancer” in 2013. As Part of this project the department started new lifestyle registration at MCC. For the years 2013 and 2014, 7117 patients registered at lifestyle registration and among them 3795 (53.3%) were males and 3322(46.7%) were females.

# **NATIONAL CANCER REGISTRY PROGRAMME**

**(INDIAN COUNCIL OF MEDICAL RESEARCH)**

The Indian Council of Medical Research initiated a network of cancer registries across the country under the National Cancer Registry Programme (NCRP) in December 1981. This move followed the recognition that there was an urgent need for strengthening the existing cancer registries and organization of new cancer registries in different regions of the country.

**The programme was commenced with the following objectives:**

1. To generate reliable data on the magnitude and patterns of cancer – this would be based on morbidity and mortality rates including incidence rates according to gender, age and residence of the patient, anatomical site of cancer and proportion of histological type or microscopic confirmation for each site; pattern of different types of cancer according to relative proportions or ratios in various population sub-groups such as religion, language spoken, educational status; clinical stage of disease when patients come to hospital for treatment and where possible the nature of treatment received and outcome;
2. To undertake epidemiologic studies in the form of case control or cohort studies based on observations of registry data;
3. Provide research base for developing appropriate strategies to aid in National Cancer Control Programme; this would be in the form of planning, monitoring and evaluation of activities under this programme;
4. Develop human resource in cancer registration and Epidemiology.

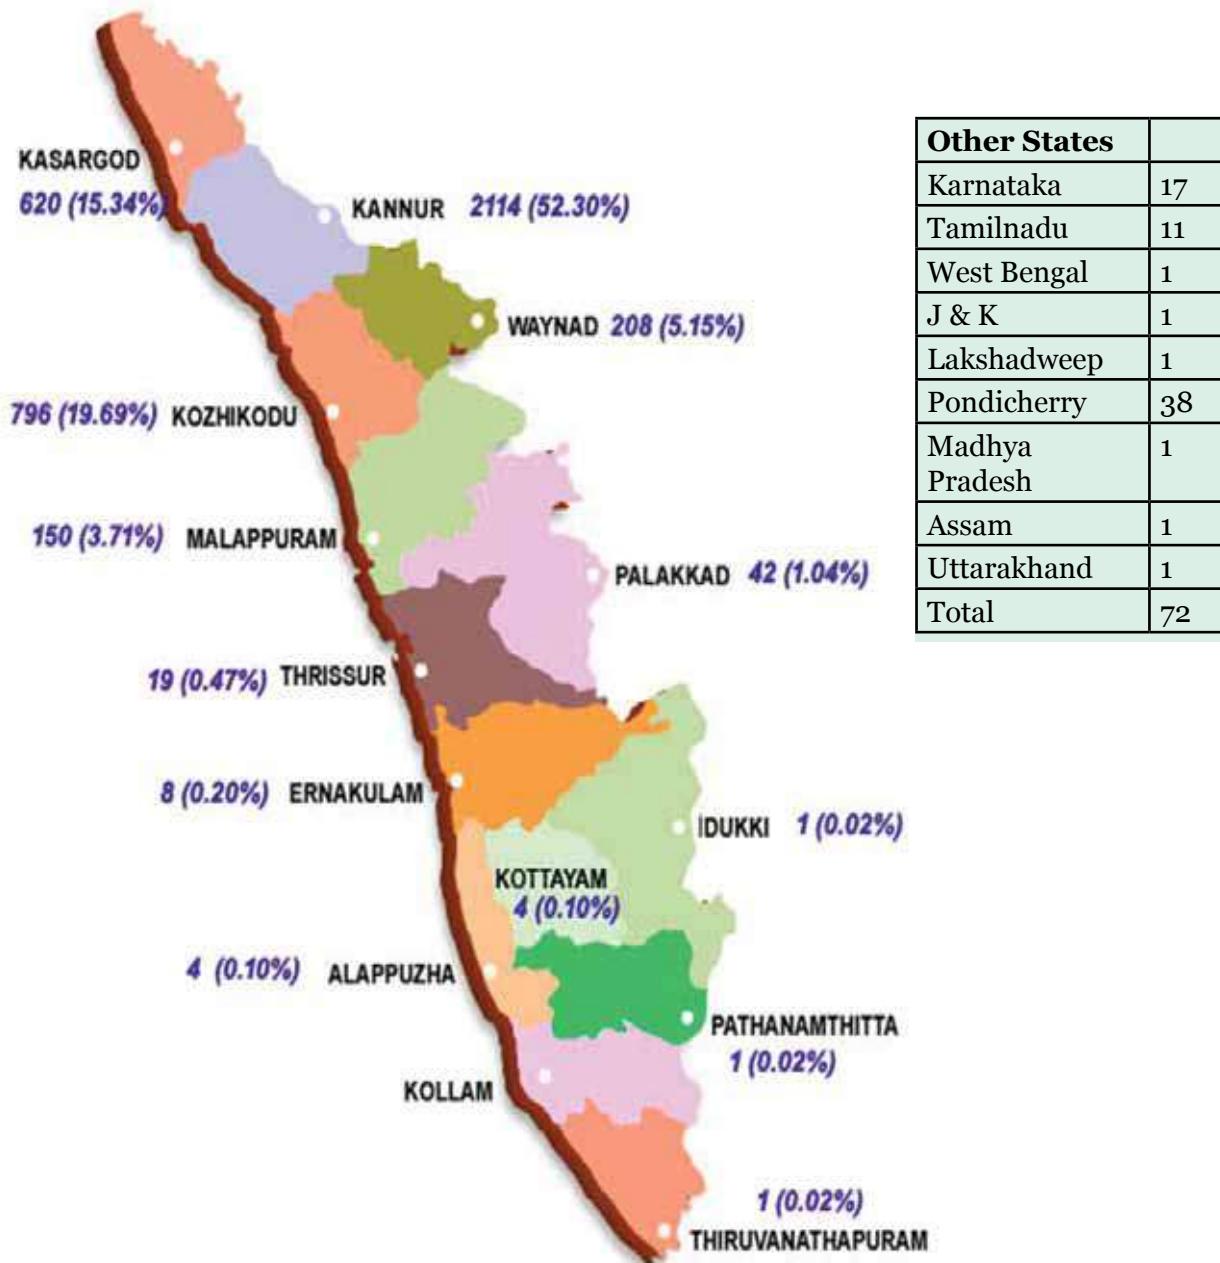

## Patterns of Patient Registration

Table 1: Pattern of patient registration

Type	Total
Malignant	4042
Non- Malignant	1963
Total	6005

### **STATE/ DISTRICT WISE ATTENDANCE OF CANCER PATIENTS REPORTED IN 2014**

## SUMMARY OF RESULTS

A total of 4042 new patients were registered in 2014 and a definite rise in patient registration was noted in 2014, when compared to the previous years. Among them 2140(52.9%) were males and 1902(47.2%) were females.

Total proportion tobacco related cancer (TRC) relative to all sites is 51.4% and 18.3 among males and females respectively. TRC with respect to all sites Lung cancer predominates (20.7%) among males, where as in females, it was mouth(5.5%). TRC with respect to specific site, among male it is Lung (40.1%) and among females it is mouth cancer (29.8%)

The ten leading cancers found in male were cancers of Lung (20.7%), Mouth (8.2%), Stomach (7.2%), Tongue (5.2%), NHL (4.8%), Larynx (4.5%), Rectum (4.2%), Oesophagus (4.1%), Oropharynx(3.4%), and Prostate(3.3%), where as in females it was Breast (31.5%), Cervix uteri (7.7%), Mouth (5.5%), Ovary (5.3%), Lung(4.4%), Thyroid (3.6%), Rectum(3.4%), Oesophagus(3.3%), Stomach (3.2%), and Corpus Uteri (3.0%).

Based in different methods of diagnosis microscopically diagnosed was 84.7% in Males and 89.3% in Females and 73.3% had histology of primary in males and 83.7% in females. According to Broad group of treatment among males 36.8% received treatment only at RI and among females it was 39.3%. The clinical extent of disease (Treatment only at RI) was regional in 56.4% in males and 65% in females.

The system wise leading cancers wise leading cancers were, head and neck (854, 66.7% males and 33.3% females). The second was digestive organs (798, 62.5% males and 37.5% females). The third was Breast (607, 1.2% males and 98.8% females). The fourth leading was Respiratory system (525, 84.2% males and 15.8% females). The fifth leading was hemato RE (366, 56.6% males and 43.4% females). The sixth leading was Gynecological system (324), the seventh leading was Urinary Tract (94, 85.1% males and 14.9% females). The eighth leading was male genital organ (90), and ninth was skin (69, 69.6% males and 30.4% females). The tenth leading system was CNS (56, 58.9% males and 41.1% females). In 525 respiratory system cancer patients 43.6% were chronic smokers. In 798 digestive system, 8.4% were chronic alcoholic and in 854 head & neck-cancers, 21.4% had chronic pan chewing habit. Among hereditary cancers, 25.2% of colon cancer patients had family history of cancer.

The ten leading cancers irrespective of sex were recorded as Breast (15.01%), Lung (12.9%), Mouth (6.9%), Stomach (5.3%), Tongue (4.1%), NHL (3.9%), Rectum (3.8%), Esophagus (3.7%), Cervix (3.6%), and Larynx (2.6%) respectively. Among 28 (0-14 years) child hood cancers the leading cancers were Leukemia's (46.4%). Among 4042 patients 2768 (68.5%) were new cases and 1256 (31.1%) were old cases.

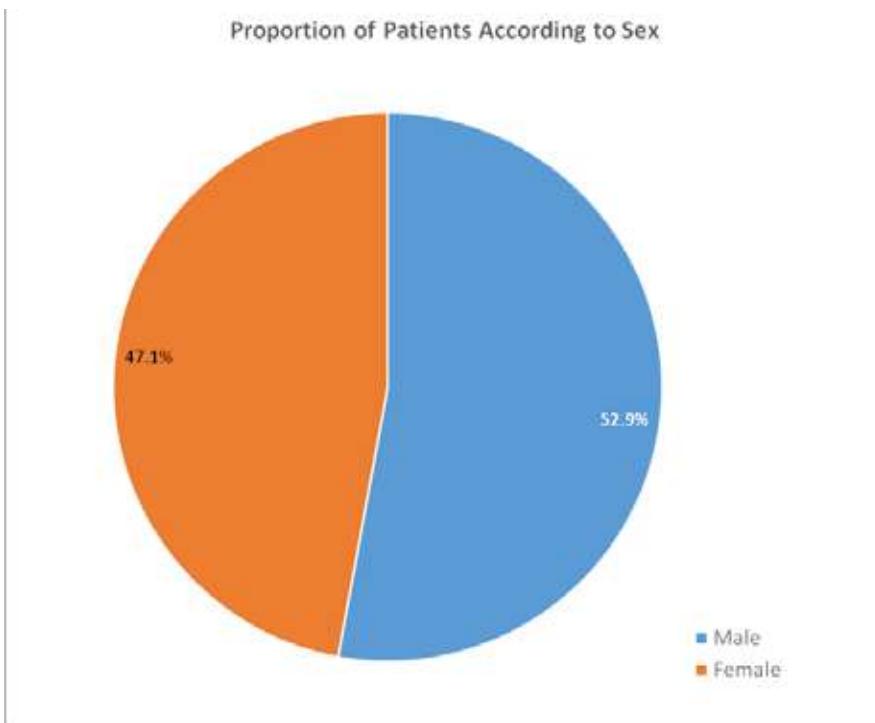

## RESULTS

### Magnitude of Total Cancers

According to cancer registration in the Hospital Based Cancer Registry of MCC, Thalassery, Kannur during the year 2014, the number of cancer patients and their relative proportion according to sex and sex ratio percentage have been presented in Table 2 . The number of cancer patients recorded in the HBCR was 4042 [males 2140(52.9%) and females 1902(47.1%)]

**Table 2:Table Number(# ) and Proportion(%) according to Sex and Sex Ratio Percent**

Male		Female		Sex Ratio	Total Cases
#	%	#	%		
2140	52.9	1902	47.1	112	4042

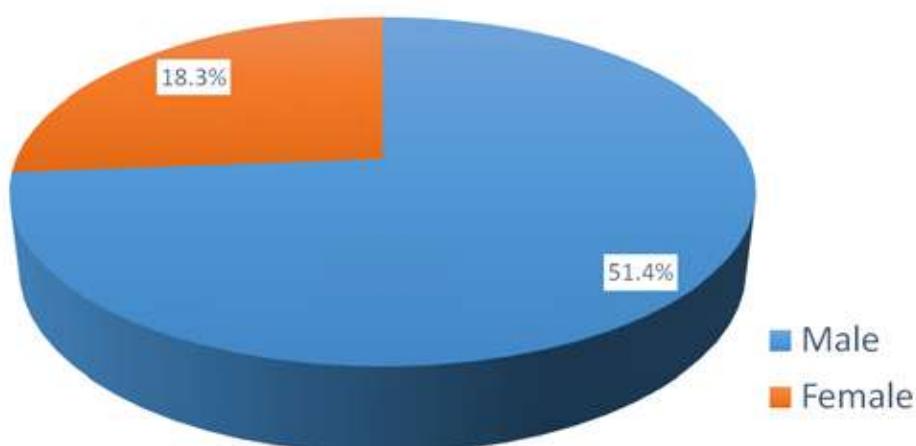

### Tobacco Related Cancers (TRC)

Total proportion of tobacco related cancer (TRC) relative to all sites is 51.4% and 18.3% among males and females respectively. TRC with respect to all sites, lung cancer predominance (20.6%) among males, whereas females it is mouth (5.5%)]

**Table 3: Number and Proportion of Cancers associated with Use of Tobacco relative to all sites of Cancer**

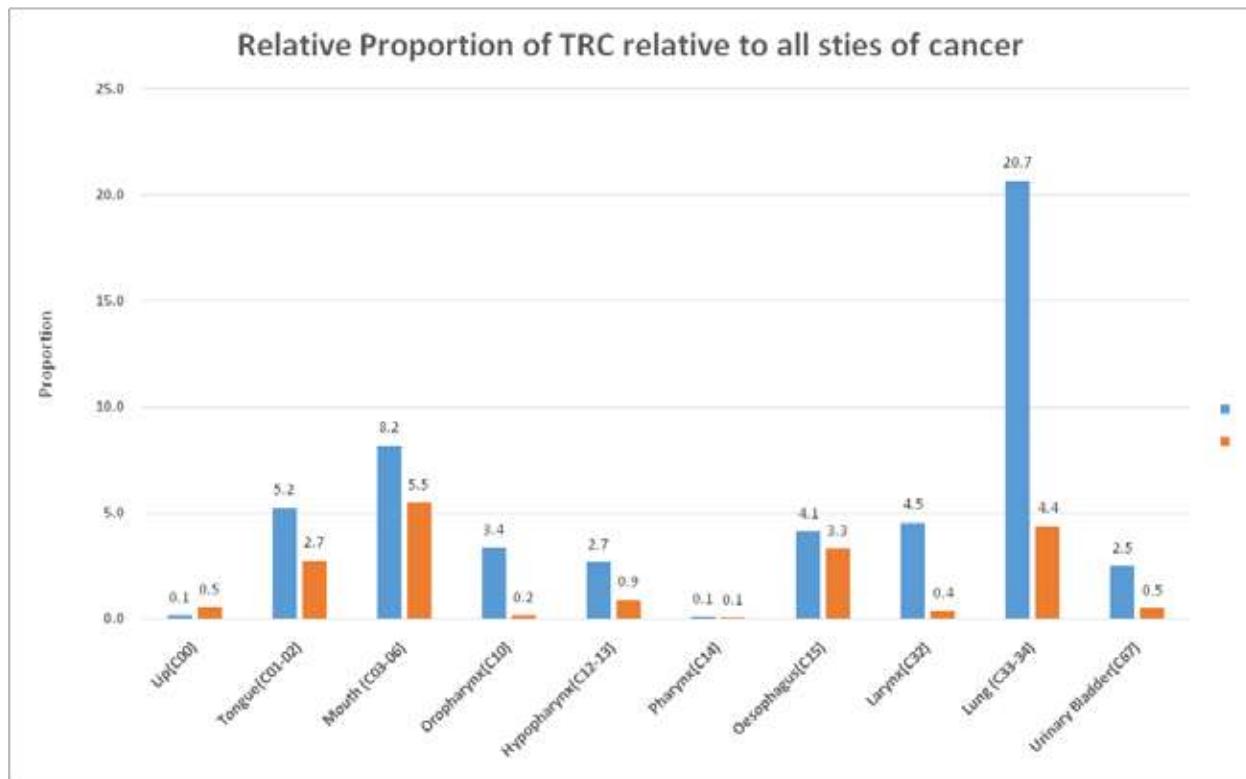

Males			Females		
All sites	#	%	All sites	#	%
2140	1101	51.4	1902	349	18.3

**Relative Proportion of Cancers Associated with use of Tobacco relative to all sites of cancer**

**Table 4: Number (#) and Proportion (%) of Tobacco Related Cancers (TRC) relative to all sites of Cancer**

Site of Cancer	Males		Females	
	#	%	#	%
Lip (C00)	3	0.1	10	0.5

0	Able to carry out all normal activity without restriction
1	Restricted in physically strenuous activity but ambulatory and able to carry out light work
2	Ambulatory and capable of all self-care but unable to carry out any work: up and about more than 50% of waking hours
3	Capable of only limited self-care; confined to bed or chair more than 50% waking hours
4	Completely disabled; cannot carry on any self-care totally confined to bed or chair
9	Unknown

## Ten Leading Cancers - irrespective of Sex

**Table 14:Leading cancers irrespective of Sex**

Sl. No	Site	#	%
1	Breast	607	15.01
2	Lung	525	12.9
3	Mouth	279	6.9
4	Stomach	214	5.3
5	Tongue	164	4.1
6	NHL	159	3.9
7	Rectum	153	3.8
8	Oesophagus	151	3.7
9	Cervix	147	3.6
10	Larynx	104	2.6

### I. Breast Cancer

- Total Number (ICD 10: C50 ) :607(98.8% in females and 1.1% in males)
- Breast cancer in females ranks first among all the cancers.
- Ist leading cancer among females : 31.5%
- Male to female ratio : 0.01:1
- Average age at diagnosis is years:53 years
- Peak age group: 45-49 years
- Histology: Infiltrating Ductal Carcinoma: 86% in females and 71% in males.
- Method of diagnosis: Microscopic : 95% in females and 100% in males
- Detailed Microscopic diagnosis: Histology of Primary: 95% in femalesand 86% in males.
- Broad treatment group: Treatment only at RI: 47% in females and 43% in males
- Clinical extent of disease(Trmt only at RI): Regional: 80.9% in females and 100% in males
- Type of treatment (Trmt only at RI) : S+R+C: 26.5% in females
- Treatment status(Excluding cancer previously treated) : Received: 76.7% in females and 71.4% in males
- Intention to treat : Curative/Radical: 84.1% in females and 100% in males
- Marital status : Married: 74% in females and 100% in males
- Religion : Hindu: 62% in females and 86% in males
- Education : Secondary: 28.8% in females and 42.9% in males.
- Mother Tongue : Malayalam : 99% in females and 100% in males

## II. Lung Cancer

- Total Number (ICD 10: C33-34) :525(15.8% in females and 84.2% in males)
- Lung cancer in males ranks first and second rank among all cancers
- Ist leading cancer among males : 20.7%
- Male to female ratio:1:0.19
- Average age at diagnosis is years:63 years
- Peak age group: 65-69 years in females and 60-64 in males.
- Histology:Adenocarcinoma: 33.7% in females and 16.3% in males.
- Method of diagnosis: Microscopic : 71.1% in females and 77.8% in males
- Detailed Microscopic diagnosis: Histology of Primary: 48.2% in females and 58.4% in males.
- Broad treatment group: Treatment only at RI: 34.9% in females and 39.6% in males
- Clinical extent of disease(Trmt only at RI): Distant: 89.7% in females and 78.3% in males
- Type of treatment (Trmt only at RI) : R-Therapy: 65.5% in females and 60.6% in males
- Treatment status(Excluding cancer previously treated) : Received: 41.4% in females and 44.9% in males
- Intention to treat : Palliative: 86.2% in females and 82.9% in males
- Marital status : Married: 69.9% in females and 92.5% in males
- Religion : Hindu: 54.3% in females and 54.2% in males
- Education : Illiterate: 22.9% in females and 13.3% in males.

### **III. Mouth Cancer**

- Total Number (ICD 10: C03-06) :279 [37.3% in females and 62.7% in males]
- Mouth cancer is the third leading cancer among all the cancers.
- IIInd leading cancer among males.
- IIIrd leading cancer among females.
- Male to female ratio:1:0.59
- Average age at diagnosis: 64 years.
- Peak age group: 60-64 years in males and 65-69 years in females
- Histology : Squamous cell carcinoma : 81.7% in females and 79.4% in males
- Method of diagnosis: Microscopic: 92.3% in females and 89.7% in males
- Detailed Microscopic diagnosis: Histology of Primary: 91.3% in females and 85.7% in males.
- Broad treatment group: Treatment Only at RI: 48.1% in females and 49.1% in males
- Clinical extent of disease: Regional: 92% in females and 97.7% in males
- Type of treatment (Treatment only at RI) : S+R : 38% in females and 33.7% in males.
- Treatment status(Excluding cancer previously treated) : Received: 63.3% in females and 68.8% in males
- Intention to treat : Curative/Radical: 68% in females and 69.8% in males
- Marital status : Married : 56.7% in females and 92% in males
- Religion : Hindu: 60.6% in females and 66.3% in males.
- Education : Illiterate: 45.2% in females and 20.6% in males.

## IV. Stomach Cancer

- Total Number (ICD 10: C16 ) : 214 (72.0% in males and 28.0% in females)
- Stomach cancer is the 4th leading site among all cancers
- 3rd leading cancer among males
- 9th leading cancer among females
- Male to female ratio: 2.5:1
- Average age at diagnosis : 62 years

- Peak age group: 60-64 years in males and 70-74 years in females
- Histology : Adenocarcinoma : 56% in males and 43% in females
- Method of diagnosis: Microscopic: 86% in males and 88% in females
- Detailed Microscopic diagnosis: Histology of Primary: 83% in males and 85% in females.
- Broad treatment group: Treatment only at RI: 23.4% in males and 20% in females
- Clinical extent of disease: Distant: 50% in males and 66.7% in females
- Type of treatment (Treatment only at RI):R-therapy : 25% in males and 33.3% in females.
- Treatment status(Excluding cancer previously treated) : Received: 31% in males and 30% in females
- Intention to treat : Palliative: 58.3% in males and 58.3% in females.
- Marital status : Married: 92% in males and 65% in females.
- Religion : Hindu: 62% in males and 62% in females
- Education : Primary: 32% in males and 33% in females

## V. Tongue Cancer

- Total Number (ICD 10: C01-02) : 164(31.7% in females and 68.3% in males)
- Tongue cancer is the fifth leading cancer among all
- 4th leading cancer among males
- Male to female ratio: 2.1:1
- Average age at diagnosis is years. 61 years
- Peak age group: >75 years in females and 60-69 years in males
- Histology : Squamous cell Carcinoma: 80.4% in males and 80.8% in females
- Method of diagnosis: Microscopic: 95.5% in males and 92.3% in females
- Detailed Microscopic diagnosis: Histology of Primary: 88.4% in males and 90.4% in females
- Broad treatment group: Treatment only at RI : 50.9% in males and 51.9% in females
- Clinical extent of disease(Treatment Only at RI): Regional: 86% in males and 88.9% in females
- Type of treatment (Treatment only at RI): Surgery: 51.9% in females and 31.6% in males
- Treatment status(Excluding cancer previously treated) : Received: 74% in males and 71.1% in females
- Intention to treat :Curative/Radical : 61.4% in males and 81.5% in females
- Marital status : Married: 90.2% in males and 55.8% in females
- Religion : Hindu: 64.3% in males and 65.4% in females.
- Education : Illiterate: 36.5% in females and 8.9% in males.

## VI. NHL Cancer

- Total Number (ICD 10: C82-85,C96) :159(64.8% in males and 35.2% in females)
- NHL cancer is the 6th leading cancer among all
- 5th leading cancer among males
- Male to female ratio:1:0.5
- Average age at diagnosis is years: 56 years
- Peak age group: 65-69 in females and 60-64 years in males
- Histology : NHL Large B cell Diffuse : 29.1% in males and 16.1% in females
- Method of diagnosis: Microscopic : 96.1% in males and 100% in females
- Detailed Microscopic diagnosis: Histology of Primary: 96.2% in males and 100% in females
- Broad treatment group: Treatment only at RI: 36.9% in males and 53.9% in females
- Clinical extent of disease (Treatment only at RI): Regional: 65.8% in males and 43.3% in females.
- Type of treatment (Treatment only at RI): C-Therapy 73.7% in males and 76.7% in females.
- Treatment status(Excluding cancer previously treated) : Received: 52.8% in males and 60% in females
- Intention to treat :Curative/Radical : 89.8% in males and 73.3% in females
- Marital status : Married: 87.4% in males and 67.9% in females
- Religion : Hindu : 49.5% in males and 66.1% in females
- Education : Primary: 28.2% in males and 17.9% in females

## VII. Rectum Cancer

- Total Number (ICD 10: C19-20) : 153(41.8% in females and 58.2% in males)
- Rectum cancer is the 7th leading cancer among males and females
- Male to female ratio: 1:0.7
- Average age at diagnosis is years: 62 years
- Peak age group: >75 in females and males
- Histology : Adeno carcinoma: 79.7% in females and 78.7% in males
- Method of diagnosis: Microscopic: 89.9% in males and 95.3% in females
- Detailed Microscopic diagnosis: Histology of Primary : 86.5% in males and 93.8% in females
- Broad treatment group: Treatment only at RI: 33.7% in males and 46.9% in females
- Clinical extent of disease(Treatment Only at RI): Regional: 73.3% in males and females
- Type of treatment (Treatment Only at RI): S+R+C : 36.7% in males and 56.7% in females
- Treatment status(Excluding cancer previously treated) : Received: 53.6% in males and 68.2% in females
- Intention to treat : Curative/Radical: 80% in males and 73.3% in females
- Marital status : Married: 93.5% in males and 54.7% in females
- Religion : Hindu : 59.6% in males and 54.7% in females
- Education : Primary: 29.2% in males and 28.1% in females

## **IX. Cervix Cancer**

- Total Number (ICD 10: C53 ) :147
- Cervix cancer is the 9th leading cancer among all cancers
- 2nd leading cancer among females
- Average age at diagnosis is years: 59 years
- Peak age group: 65-69 years
- Histology : Squamous cell carcinoma non keratinizing : 25.2%
- Method of diagnosis: Microscopic: 85.7%
- Detailed Microscopic diagnosis: Histology of Primary : 84.4%
- Broad treatment group: Treatment only at RI : 46.3%
- Clinical extent of disease(Treatment only at RI): Regional: 82.4%
- Type of treatment : R+C: 63.2%
- Treatment status(Excluding cancer previously treated) : Received: 64.8%
- Intention to treat : Curative/Radical : 79.4%
- Marital status : Married: 72.8%
- Religion : Hindu : 72.1%
- Education : Middle (25.2%)

**Table 134: Number and Relative Proportion of Cervix cancer by five year age group**

Age Group	Females (n=147)		Total (n=147)	
	#	%	#	%

## X. Larynx Cancer

- Total Number (ICD 10: C32) :401(6.7% in females and 93.3% in males)
- Larynx cancer is the 10th leading cancer among all cancers
- 6th leading cancer among males
- Male to female ratio:1:0.07
- Average age at diagnosis : 63 years
- Peak age group: 60-64 years in males and females
- Histology :Squamous cell carcinoma: 83.5% in males and 42.9% in females
- Method of diagnosis: Microscopic: 95.9% in males and 71.4% in females
- Detailed Microscopic diagnosis: Histology of Primary: 87.6% in males and 42.9% in females
- Broad treatment group: Treatment only at RI: 53.6% in males and 57.1% in females.
- Clinical extent of disease(Treatment only at RI): Regional: 100% in females and 82.7% in males
- Type of treatment : R+C: 50% in females and R-therapy: 40.4% in males
- Treatment status(Excluding cancer previously treated) : Received: 57.1% in females and 73.2% in males
- Intention to treat : Curative/Radical: 71.2% in males and 75% in females
- Marital status : Married: 94.8% in males and 28.6% in females
- Religion : Hindu: 28.6% in females and 64.9% in males
- Education : Primary: 28.6% in females and 32% in males.

# **CONSOLIDATED REPORT (2010-2014)**

## Five Year Consolidated Report (2010-2014)

**Table 1: Number and Proportion According to Sex**

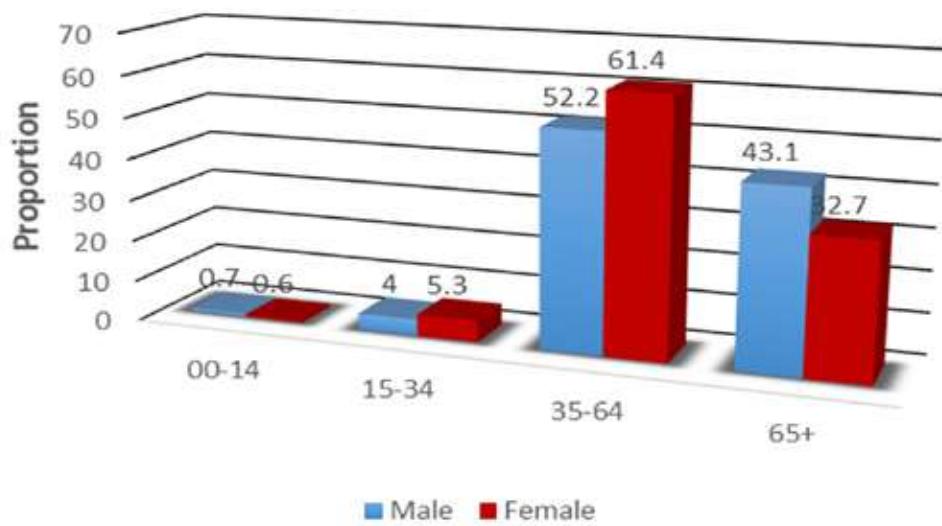

Number (#) and Proportion (%) according to Sex and Sex Ratio Percent					As on : 06/06/2016
Males		Females		Sex Ratio	Total Cases
#	%	#	%		
8432	53.2	7406	46.8	114	15838

**Table 2: Number and Proportion of Cancer by Broad Age Groups**

Broad Age Groups	Males		Females	
00-14	59	0.7	43	0.6
15-34	338	4.0	393	5.3
35-64	4400	52.2	4547	61.4
65+	3635	43.1	2423	32.7
All ages	8432	100.0	7406	100.0

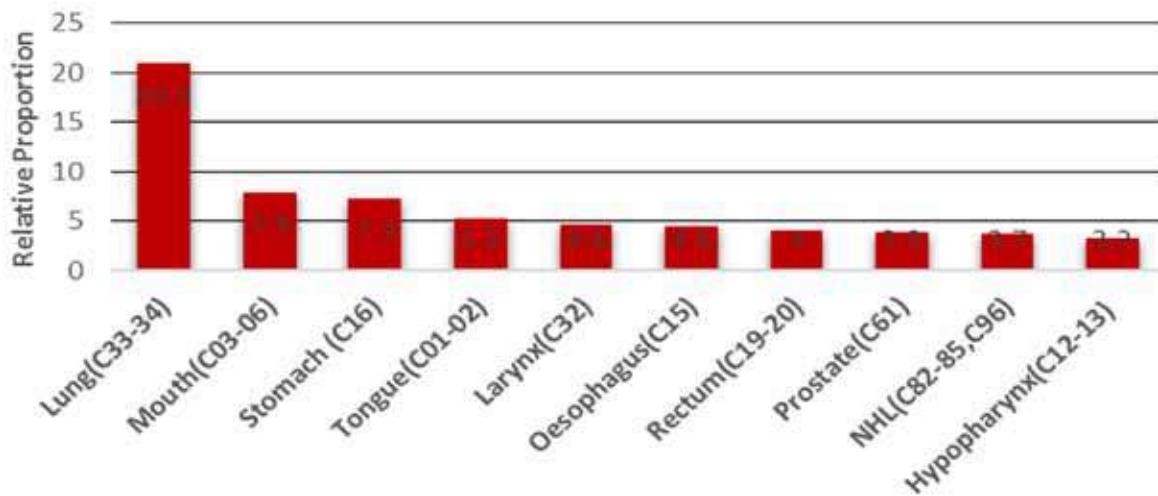

## Proportion of Cancers by Broad Age Group

**Table 3: Number and Proportion of Leading Sites of Cancer - Males**

Rank	Sites	#	%
1	Lung etc (C33-34)	1764	20.9
2	Mouth (C03-06)	663	7.9
3	Stomach (C16)	617	7.3
4	Tongue (C01-02)	446	5.3
5	Larynx (C32)	384	4.6
6	Oesophagus (C15)	381	4.5
7	Rectum (C1920)	340	4.0
8	Prostate (C61)	330	3.9
9	NHL (C82-85, C96)	316	3.7
10	Hypopharynx (C12-13)	268	3.2
	All Sites	8432	100.0

## Relative Proportion (%) of Leading site of cancers (Males)

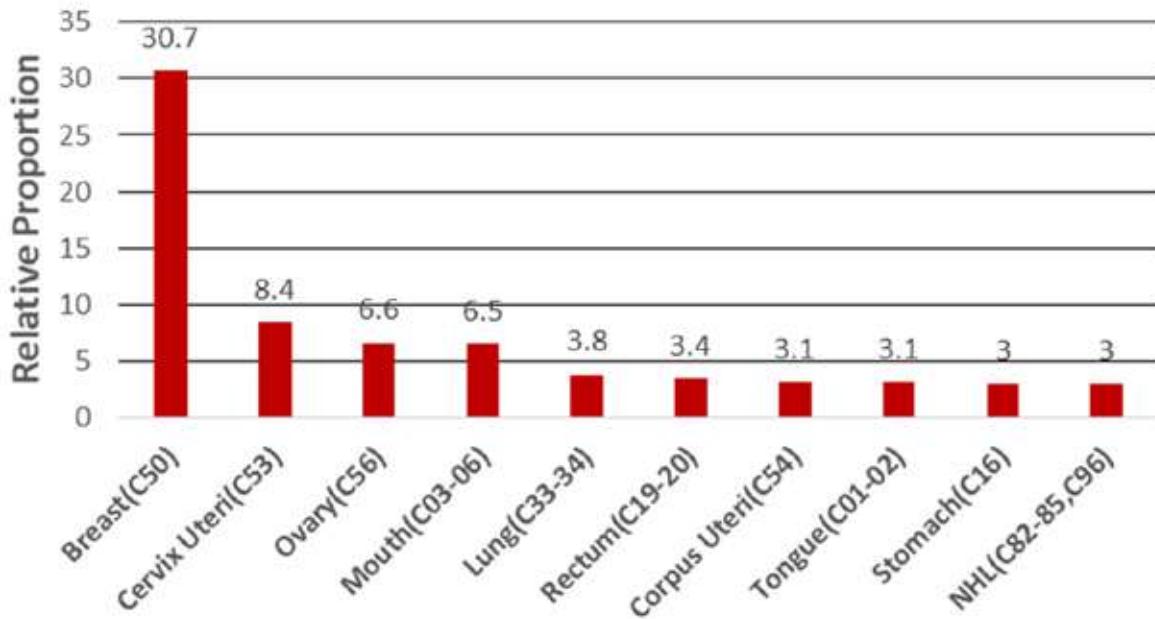

**Table 4: Number and Proportion of Leading Sites of Cancer - Females**

Females (As on 06/06/2016)

Rank	Sites (ICD 10)	#	%
1	Breast (C50)	2271	30.7
2	Cervix (C53)	619	8.4
3	Ovary etc (C56)	490	6.6
4	Mouth (C03-06)	484	6.5
5	Lung etc (C33-34)	278	3.8
6	Rectum (C19-20)	255	3.4
7	Corpus Uteri (C540)	230	3.1
8	Tongue (C01-02)	229	3.1
9	Stomach (C16)	225	3.0
10	NHL (C82-85, C96)	221	3.0

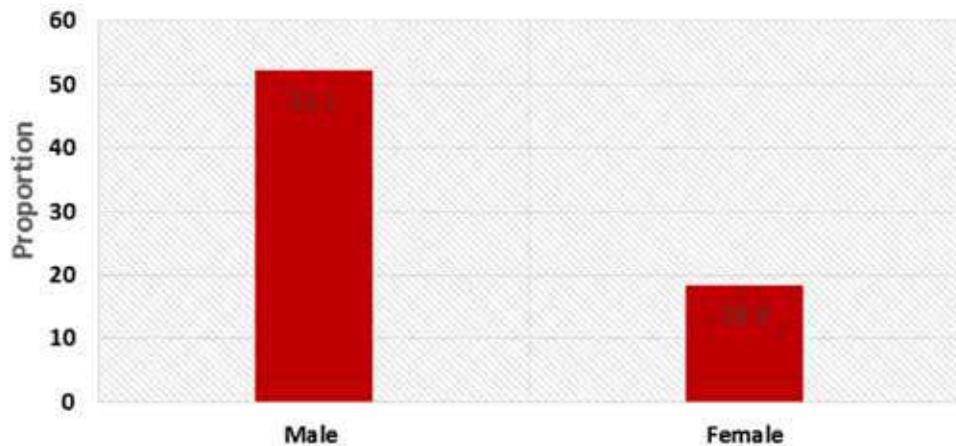

## Relative Proportion (%) of Leading Site of Cancers(Females)

**Table 5: Number and Proportion of Cancers associated with Use of Tobacco relative to all sites of Cancer**

Males			Females		
All sites	#	%	All Sites	#	%
8432	4397	52.1	7406	1364	18.4

**Proportion of Cancers Associates with use of Tobacco relative to all sites of cancer**

**Table 5: Number and Proportion of Tobacco Related Cancers (TRC) relative to all sites of Cancer**

(As on 06/06/2016)

Sites of Cancer	Males		Females	
	#	%	#	%
Lip (Coo)	24	0.3	41	0.6
Tongue (Co1-02)	446	5.3	229	3.1
Mouth (Co3-06)	663	7.9	484	6.5
Oropharynx (C10)	247	2.9	13	0.2
Hypopharynx (C12-13)	268	3.2	68	0.9
Pharynx (C14)	6	0.1	2	-
Oesophagus (C15)	381	4.5	190	2.6
Larynx (C32)	384	4.6	25	0.3
